

Sceptre Newest Sound Bar Delivers Exhilarating Sound Experience

Compact all-in- one Speaker Sound Bar 2.1 with built-in subwoofer delivers room-filling high fidelity audio

City of Industry, CA – February 26, 2013 – [Sceptre](#), superior manufacturers of world class LED and LCD HDTVs and PC displays, unveils the [SB301523 Speaker Sound Bar 2.1](#) with built-in subwoofer, the all-in-one sound solution for budget-conscious users seeking a dynamic home audio experience without sacrificing space and design.

The SB301523 Sound Bar 2.1 produces heart pumping surround sound through dual 20 Watt speakers and a built-in 40 Watt subwoofer. In addition, integrated technologies such as High Efficiency Amplifier, SRS WOW audio and sculpted bass response deliver a more natural audio with a wider sound field and raised sound image.

The perfect replacement for expensive and bulky home theater systems, Sceptre's newest Speaker Sound Bar 2.1 eliminates wires and the need for a separate subwoofer; and is compact enough to fit on any shelf or in front of any HDTV. Elegant enough to become a centerpiece, it features a touch sensor control panel to easily adjust volume, preset modes or sound sources and an LED screen that displays all settings.

"Sceptre's new Sound Bar 2.1 with built-in subwoofer gives users the ability to enjoy high quality sound without the hassle of purchasing and installing expensive entertainment systems," said Sceptre's Vice President of Operations, Cathy Chou. "This all-in-one unit provides a much richer sound than traditional 2.0 sound bars, giving users movie theater quality surround sound with deep bass and crisp high notes."

The SB301523 Sound Bar 2.1 can be easily wall-mounted using two screws and comes with an infrared remote control compatible with multiple Sceptre TVs, eliminating the need of having multiple remote controls. In addition, it includes 4 preset sound modes individually tuned to deliver the best sound quality to enjoy music, movies, news, and video games.

"Our latest Sound Bar reinforces our commitment to providing quality home entertainment solutions with the perfect balance of performance and affordability," added Chou.

Ideal for HDTVs 40-inches or smaller, the Sceptre Speaker Sound Bar 2.1 with built-in subwoofer is currently available for \$159.99 at Amazon, Tiger Direct, Sears, K-Mart and NewEgg.
